End Point Assessment

All students on the course undertake an End Point Assessment (EPA) to complete their Technician Scientist, Level 5 Apprenticeship. Students will be expected to undertake the EPA after the successful completion of their (FdSc Biomedical Science. The EPA will be delivered by a separate training provider. The EPA will be approximately 100% coursework (including a work-based problem-solving project report, presentation and discussion (of project report) and a vocational competence discussion).

The EPA will contain;

- x Work place problem solving project
